

Timegate Traveler 3

Escape from Pokémon Planet

Opening

Professor *Nate* has become witness to a world where Pokémon control people.

He is attacked by a cruel resident of this world named Ledian.
The capsule of his temporal transport is taken away.

Ledian plans to exterminate Professor *Nate* in order to silence him.

Can Professor *Nate* safely return to his own time?

Professor *Rosa* has become witness to a world where Pokémon control people.

She is attacked by a cruel resident of this world named Ledian.
The capsule of her temporal transport is taken away.

Ledian plans to exterminate Professor *Rosa* in order to silence her.

Can Professor *Rosa* safely return to her own time?

Professor *Nate* / *Rosa*: Stop! If all you wanted was the temporal transport, then you don't need me anymore!

Ledian: That's right. I have no more need for you... That's why I am going to eliminate you...

Black Belt: Temporal transport... Look likes a Human Ball? Ledian has it... Makes me go back to Ball... Then, temporal transport comes out...

Professor *Nate* / *Rosa*: Black Belt, thank you. I feel like I understand.

Ledian: Black Belt... Are you so worthless a human that you can't follow even the most basic of orders? Worthlessness is a crime... I'll eliminate you all...

Professor *Nate* / *Rosa*: I'll show you what humans are really made of...

Ledian: I don't understand. The existence of you humans is only validated when you're used by us Bug-type Pokémon. You can't do anything on your own. Such an immature life-form...

Professor *Nate* / *Rosa*: We may not be strong on our own, but that's why we help each other out. I have my assistant, Strange, as well as *Reuniclus*... I also have the help of Black Belt!

Ledian: Silence! You can't even fly into the sky or spin a string! You can't shoot powerful beams or evolve into stronger forms! And you've only got two arms...

Scene 1 Ends

Ledian: Just who do you think you are anyway? You think it's OK to come into the future like this and just go back home? You think it's OK to come into our world, take whatever you please, and then return to your own era at your own convenience? I don't think so!

Professor Nate / Rosa: But...

Ledian: Or perhaps you thought that the future would be an even better place for you humans? It's only because of humans in the past like you, who did whatever they pleased, that this world turned out like it did... Idiotic humans... How can you be so naive?

Professor Nate / Rosa: No! It's not true...

Ledian: Hmph... No matter... Us Bug-type Pokémon are thankful for the mistakes you humans made. It's all thanks to you that we came to control the future!

Professor Nate / Rosa: All your fault!

Ledian: There you go again... Always blaming other people for your own mistakes... I'm not a person, though... ... Ouch! That hurts! What's going on? What is this powerful energy coming out of the capsule your time machine is in?

Professor Nate / Rosa: You're wrong!

Ledian: You humans are all the same... Always averting your gaze from reality when it's not convenient... Always denying what you know is true... ... Ouch! It's so cold! What's going on? Some strange coolant gas is seeping out of the capsule your time machine is in...

Professor Nate / Rosa: I'll change it!

Ledian: Hah! As if you could... Of course you can't... ...Wait a second. You managed to create a time machine when even us Bug-type Pokémon couldn't... Could it be possible that you have the power to change the future? ... Ouch! That's hot! What's going on? This capsule that your time machine is in is starting to heat up...

Scene 2 Ends

If Professor Nate / Rosa Said "All your fault!"

Ledian: It's so bright... It's burning my eyes...

Professor Nate / Rosa: Oh no... If the energy keeps pouring out of my temporal

transport like this, it might explode!

Ledian: What?!

Professor Nate / Rosa: After storing up so much energy, if my temporal transport were to explode now, it could quite possibly bend space and time and create a black hole!

Ledian: A black hole?! You mean a mass of gravity that swallows up everything?

Professor Nate / Rosa: This is bad...

Ledian: Now I get it... A dangerous invention like this is only to be expected of you barbarian humans! Bug-type Pokémon would never think to create such a perilous device! This is a terrible weapon, made to annihilate us Bug-type Pokémon! It was your goal all along to eliminate us all, wasn't it?!

If Professor Nate / Rosa Said “You're wrong!”

Professor Nate / Rosa: Ugh... This coolant liquid is extremely powerful...

Ledian: Cold... So cold... I'm not good against ice...

Professor Nate / Rosa: There's a good chance that it will spread until it engulfs the entire world, ushering in a new ice age!

Ledian: An ice age... Us Bug-type Pokémon wouldn't survive...

Professor Nate / Rosa: This is bad...

Ledian: Now I get it... A dangerous invention like this is only to be expected of you barbarian humans! Bug-type Pokémon would never think to create such a perilous device! This is a terrible weapon, made to annihilate us Bug-type Pokémon! It was your goal all along to eliminate us all, wasn't it?!

If Professor Nate / Rosa Said “I'll change it!”

Professor Nate / Rosa: It'll be OK! My temporal transport is highly resistant to heat!

Ledian: Just like a Scientist to get all excited whenever you talk about something scientific...

Professor Nate / Rosa: Hmph... I'm the brilliant scientist who invented this temporal transport! A small complication such as this is well within expectations!

Ledian: It's as if you entered your own world... What incredible concentration... Another common trait of you Scientists...

Professor Nate / Rosa: I'll show you I can change history!
Scene 3 Begins
Professor Nate / Rosa: I wonder if I'll ever be able to make it back home...
Ledian: I'll show you that the future belongs to us Bug-type Pokémon!
Scene 4 Begins
Professor Nate / Rosa: Gah... Not enough energy! I need electric energy that's as powerful as a thunderbolt!
Scene 5 Begins
Professor Nate / Rosa: It's not easy to go back to the past from the future. It takes a lot more energy than it does to come from the past into the future...
Ledian: I won't let you!
Professor Nate / Rosa's Reuniclus Uses Future Sight
Professor Nate / Rosa: Hmmm... I guess it just won't work... How unfortunate. I heard this move could transcend time.
Ledian: What are you doing?
Professor Nate / Rosa: What's that? Oh, I just thought it would be nice if I could bend time using a Pokémon move...
Ledian: Of all the idiotic things... Did you really invent this time machine?
Professor Nate / Rosa: That's different!
Ledian: Ugh... Why am I wasting my time with this dumb human?
Professor Nate / Rosa: What?! Cut me some slack... It was worth a try!
Ledian: Whatever... At least you're dense enough to provide some entertainment. I guess it's better than being alone...
Good Ending
If the Transport was Knocked Out with Thunder
Professor Nate / Rosa: OK! It's charged up enough energy now! I should be able to go back to the past!

Ledian: So you tricked me into bringing out the temporal transport so you could charge it with lightning... ...Impressive, I must say. You may have only two arms, but you're pretty good...

Professor Nate / Rosa: Ledian... You may have been right. I was selfish to have come into the future like this... It was only in the interest of science that I came to this era. I apologize if I've made a mess of things here... Here! I'll give you these items back.

Ledian: What is this? Some dirt...rocks...plant seeds? It's a bunch of junk... ...What's this?!

Professor Nate / Rosa: What's wrong?

Ledian: ...Do you know what this is? You just saved your life, human... ...No, you just saved the lives of all humans--past, present, and future... How impressive... ...This is the stone that allowed us Bug-type Pokémon to revolt against you humans... That's right... This is the Evolution Stone... If you go back to your era without it, everything will change...

...And so I was able to safely return to my own era...

...If I hadn't returned my research samples to Ledian before coming back, then I would have brought back the Evolution Stone, which would have caused the Bug-type Pokémon of my era to evolve at a rapid pace, and they would have eventually revolted against us humans...

...I never would have thought that I would have been responsible for changing the fate of the human race...

...It still remains to be seen whether changing the future like I did was indeed a good thing, though...

...However, before I changed the future, Ledian looked down on all other life-forms and lived all alone...

...I hope that in the future that I brought about, Ledian will at least feel a little less lonely.

That's all that I can really do right now...

Bad Ending

**If Professor Nate / Rosa's Reuniclus was Knocked Out
If Ledian's Black Belt was Knocked Out**

If Neither Ledian's Black Belt nor the Transport were Knocked Out	
Professor Nate / Rosa:	I'm not sure exactly why, but it looks like I might be able to use the temporal transport now...
Ledian:	Stop right there! I won't let you get away! I will eliminate you!
Professor Nate / Rosa:	Ha ha ha! Farewell, Ledian! I've got the research samples that I came for, so there's no reason for me to stick around here any longer! I'm going back home to my own era to live in peace!
Ledian:	Mwa ha ha ha... You fell right into my trap!
Professor Nate / Rosa:	What?!
Ledian:	I realized that you carry the Evolution Stone in your bag, so I decided to let you go... I'm sure I don't have to tell you what will happen to the Pokémon of your era if you bring the Evolution Stone back... Bon voyage, foolish Human... I'll be waiting for you here, in the world after the Pokémon revolt...
Professor Nate / Rosa:	It can't be so! Oh no... It's no good... I can't stop the temporal transport! No! I don't want to go back like this! If I go back now, the revolt will occur!
Ledian:	You were such a foolish, foolish human... Not to mention such a fun toy to play with... For a pathetic human with only two arms, you sure provided me with much entertainment!
...And so I was able to return safely to my own era... ...However, it was because of my safe return that the world changed forever... ...The effects of the Evolution Stone were quick. The Bug-type Pokémon soon transformed into terrible overlords who reigned over us. Soon, we normal humans became a different kind of human--their playthings...	
Strange Ending	
If the Transport was Knocked Out with a Move Other than Thunder	
Professor Nate / Rosa:	What's this? These energy readings coming from the temporal transport shouldn't be possible! They're exceeding the limit!
Ledian:	What's going to happen?
Professor Nate / Rosa:	Hmmm? Oh... Oh no!

Ledian: What?!

...I surveyed my surroundings after regaining consciousness, but I couldn't believe what lay before me...

...For as far as the eye could see was nothing but machinery...

Entire cities made of machines, inhabited by humans and their heartless robot masters, who treated them like common parts of a great machine, discarding and replacing them as needed...

...I had come even further into the future, but it was even worse than the era in which Bug-type Pokémon reigned supreme...

In this future, robots ruled over all living beings and used them as simple tools...

I couldn't believe it. I felt my head spin, and I collapsed right then and there...

...As my consciousness began to fade away, I could see one of the robots approaching.
